

Improving Access to MNH for Women in West Java

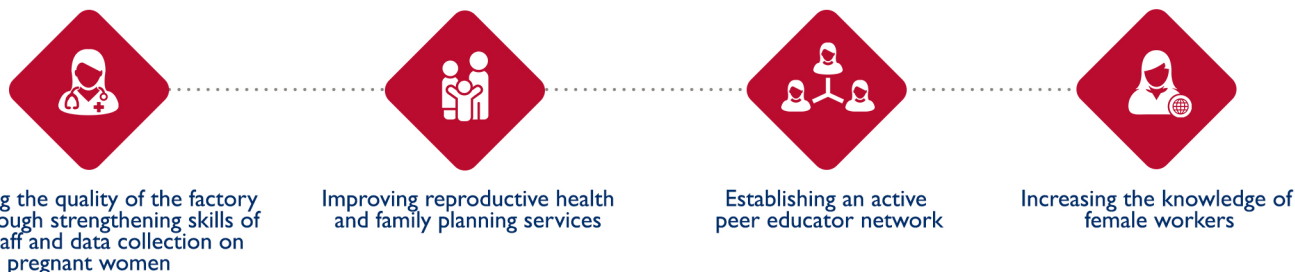

MNH in the Workplace - Chang Shin Model

COCREATION

- USAID Jalin is partnering with PT. Chang Shin Reksha Jaya, Garut District Government, DHO, IBI, POGI, Labour Union of PT. Chang Shin, Puskesmas Leles, Padjadjaran Clini, and Jhpiego to strengthen the government's existing GP2SP program (Gerakan Pekerja Perempuan Sehat Produktif/Healthy and Productive Female Workers' Movement) through the Maternal and Newborn Health (MNH) in the Workplace – Chang Shin Model.

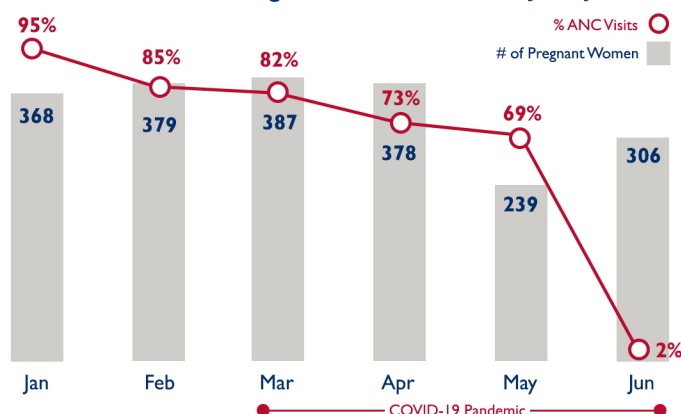

COMPONENTS

PROGRESS TO DATE

- 6 of factory clinic staff, 14 staff of DHO and the nearest health center and clinic were trained** with Balanced Counseling Strategy (BCS) method and quality ANC.
- 589 of pregnant female workers counselled** with using the Balanced Counseling Strategy (BCS) method, which has been shown to be effective in increasing postpartum family planning.
- 15 female peer educators selected** by the factory trade union as a part of the peer education activity to strengthen MNH knowledge among factory workers.
- Established collaboration** between the factory clinic, Puskesmas Leles, and Padjadjaran Clinic for service and referral support.
- In close collaboration with IBI West Java, finalized modules** on: 1) improving quality of maternity class for pregnant workers, and 2) peer educator training.

ANC Visits & Number of Pregnant Women Workers in Jan - Jun 2020

87.3% of pregnant women on average in 2019 completed ANC
In order to protect pregnant women workers from the spread of the COVID-19 pandemic, as of June 1, 2020, all pregnant women workers at PT. Chang Shin Reksha Jaya were temporarily furloughed.

Replication

This local solution is very potential to be replicated, considering the large number of factories with women workers in West Java. USAID Jalin facilitated a 2-days webinar on ANC Quality, participated by factory clinics staffs from PT. Chang Shin, PT. Glostar Sukabumi and others factory clinics in Sukabumi District
